Try installing the program again to resolve the problem. General for the following program files; httpd.exe php.exe skype.exe DComPerm.exe flexsim.exe Winfile.ex UplayService.exe Plex Media Server.exe otvdm.exe Piriform.exe Proxy.exe AccelerometerSt.exe AUEPUC.exe php-cgi.exe Gsi.exe EoCApp.exe HITMAN2.exe The solution to this problem is to replace the missing dll file where the program finds it. This can be done in many ways; Download only the required file (manually or by using DLL-Files.com CLIENT) Reinstall the program and give you this error message using the microsoft Visual C++ Redistributable for Visual Studio 2015/2017/2019 in the default Windows folder by using the DLL-Files.com CLIENT tool.dll start installing VCRUNTIME140 in the default folder using DLL-Files.com CLIENT. In the search engine, type VCRUNTIME140.dll and click Search DLL. In the search results, select VCRUNTIME140.dll VCRUNTIME140. Click install. To replace VCRUNTIME140.dll, start by downloading the appropriate version from this page. Open the file that you downloaded DLL-files.com . Extract the DLL file to a known location on your computer. After extracting the zip file, place the extracted DLL in the folder of the program requesting the file. Ex.C:\Program Files (x86)\Microsoft\Skype for Desktop\VCRUNTIME140.dll Even if you use a 64-bit Windows system, many programs are still 32-bit. 32bit programs use 32bit dll files, 64bit programs use 64bit dll files. A 64-bit Windows system, programs installed C:\Program Files (x86)\ are most likely 32bit, and programs installed C:\Program are most likely to be 64bit. Make sure you are using a 32-bit DLL file DLL and a 64-bit DLL file for a 64-bit program. If this is not done, a 0xc000007b error is likely to result. Restart your computer and try to recreate the error to determine if it has been fixed. If it does not help to place the DLL file in the program folder, place a copy of the file in the default Windows dll. The default folder for 32-bit DLL Files in the 64-bit version of Windows is C:\Windows\SysWOW64\ and the default directory for 64-bit dll files is C:\Windows\System32\ . Make sure you are overwriting existing files (but back up the original file). Restart your computer and try to recreate the error to determine if it has been fixed. If these suggestions have not resolved your issue, you may need to reinstall the Microsoft visual C++ Redistributable packages that can be found on the Microsoft Support page. x86 32bit, x64 64bit. If you are using 64-bit Windows, install both. Subscribe to dll files: by version | description | language language
